

# Brandly UAT

## Navigation

1. In blogs, 2nd and 3rd Blogs don't exist.
2. Tab doesn't have brandly icon.
3. Tab doesn't have Brandly Page Names, default React Names only.
4. Pricing Page is not linked in Footer.
5. Affiliate Page is designed and linked in Footer, even though the feature is not in this launch.
6. Headline Generator and Summary Generator not linked in Footer.
7. Hooks Generator is in Footer, even though it's not a free tool. (?)
8. Carousel Generator, LinkedIn SSI Generator are in Footer even though they are not in this launch.
9. Socials are not linked to footer icons.
10. LinkedIn Carousel Generator is in the Free Tools Dashboard for Authenticated user, even though the feature is not in launch.
11. Start For Free CTA button in Homepage doesn't work.

## Form Validation

1. Empty Posts can be pushed to LinkedIn.

## Authentication

No issues detected. Simple LinkedIn OAuth.

## Content

1. Carousel Generator, Post Scheduling, Added Users, Relationship Building, Connect & Post from Company Pages – Still mentioned in Pricing Page even though it's not in this version.
2. FAQ contains “Is there a max payout cap?” question. It is not relevant.

# Security Basics

No issues detected.

# Performance Basics

No issues detected, page load times are smooth. Generation times are fast.

# Cross Browser Compatibility

No issues detected, tested for Firefox, Edge and Chrome.

# UI and Responsiveness

Laptop/Tablet View:

1. About Page: “Our Vision” heading is too close to the subtext. Ready to Start box has overridden CSS, making Call to Action invisible.
2. LinkedIn Video Downloader: Video Downloading UI can be improved.
3. Navbar: Free Tools Dropdown needs to be more persistent, moves out of view on cursor lifting too soon. (Although can click to persist, but not a good UX practice)
4. Summary Generator: UI design has placeholders inside and tags both inside the form capsule. Looks good, but causes UX issues as clicking on the Form Capsule doesn’t capture the cursor. Cursor needs to be clicked on the empty space specifically to start typing.

In Mobile View, Following Pages need to adjusted for Responsiveness:

1. Create Post
2. Generate Hooks
3. Free Tools
4. About
5. Blogs

## Functionality

1. Free Tool Summary Generator is not working on deployed application.
2. Free Tool Headline Generator is not working on deployed application
3. Free Tool LinkedIn Video Downloader is not working on deployed application.

[401 Error all, possibly CORS issue due to migration from dev to local.]
